Disclosure: The Astate Exit Survey Report for Calendar Year 2016 is a summary of pre and post-graduation survey responses for graduating classes of May, August and December of 2016. All Information is self-reported.

Methodology: Graduating students received the Exit survey, via email, prior to each graduation ceremony (May, August and December of 2016). The Deans were consulted for their assistance in encouraging the students who were graduating to complete the survey. Surveys were completed on a voluntary basis. All data (pre and post-graduation) were imported into an excel file created by the Office of Institutional Effectiveness. Student identification numbers are used and verified by the Registrar's Office to prevent duplication of surveys and to identify those who have not completed the survey.

Column Descriptions: "Number of Graduates" information was provided by the Registrar's Office from the the students' application for graduation. "Reponded to Survey" are the number of survey submissions. "Employed Full-time", "Employed Part-Time", "Seeking Employment", "Admitted into Graduate School" and "Not Seeking Employment" are categories graduates checked to reflect their status at the time of completion of the survey. Graduates can only check one of the boxes to avoid duplication of information. Salary information on the survey document was presented in ranges. "Salary Ranges Reported by Graduates" reflects the number of responses by respondents for that particular range of salaries for the indicated major.
