Selection of a Ph.D. Advisor
Graduate Program in Environmental Sciences

This completed form must be turned in to EVS Program office by the end of the first semester as a graduate student in the EVS Program.

There are two ways to select a Ph.D. Advisor:

1. Faculty members often recruit students into their research programs and potential Ph.D. students are often identified before the student applies to the Graduate Program in Environmental Sciences.

If a potential Ph.D. student has been accepted to work under the faculty member, sign the below statement:

I accept ________________________ (student name) into my research group.

______________________________
Faculty Member Name (Please Print) Signature Date

Signature of Student Date

2. If a student has been accepted in the EVS Ph.D. program without having a Ph.D. advisor identified on entering the program, the student must discuss research opportunities with three faculty members before choosing the permanent advisor.

I, ____________________________ (Student Name [Please Print]), have discussed research opportunities with the following three faculty members:

Faculty Member #1 (Please Print) Signature Date

Faculty Member #2 (Please Print) Signature Date

Faculty Member #3 (Please Print) Signature Date

After meeting with three faculty members, I have chosen __________________________ (Faculty member name [please print]) as my permanent advisor. I will begin working in the group on ____________ (Date).

I accept this student into my research group.
