Rate Disclosures

The ASU Graduate Status Report for Calendar Year 2013 is a summary of the pre- and post- graduation surveys for graduating classes of May, August and December 2013. All information is self-reported by the graduates.

Methodology

Two weeks prior to graduation, students were provided paper graduation surveys for May and August graduations and an electronic survey two weeks before December graduation as the students picked up their cap and gowns for their respective graduation programs. Surveys were completed on a voluntary basis are part of the Senior Exit Survey. All data were imported into an excel file created by the Office of Assessment and sent to Institutional Research and Planning as the official repository of data. Student identification numbers are used and verified by the Registrar's Office to prevent duplication of surveys by the same person and to identify those who have not completed the survey.

Column Descriptions

Column information: "Number Graduates" information was provided by the Registrar's office from the students' application for graduation. "Responded to Survey" are the number of surveys returned in usable format by the respondents. "Employed Full-time", "Employed Part-Time", "Seeking Employment", "Admitted to Graduate School" and "Not Seeking Employment" are categories graduates checked to reflect their status at the time of completion of the survey. Graduates can only check one of the boxes to avoid duplication of information. Salary information on the survey document was presented in ranges. "Salary Ranges Reported by Graduates" reflects the number of responses by respondents for that particular range of salaries for the indicated major.

Post-Graduation

Post-Graduation data for May and August 2013 are included in the data. Students received email requests in early August for the May 2013 graduates and early November 2013 for the August 2013 graduates, to complete and return via online survey. As December post-graduation surveys are completed three months after graduation, the information will be migrated into this document and revised.
